

## Overview

### Automated Dose Reporting

*Scannerside & RamSoft now offer automated radiation dose reporting for CT examinations directly into your Radiology report templates. With no added effort, you can start including radiation doses into reports to meet requirements, patient & referrer expectations.*

### Advanced Analytics Package

*You can go beyond mere dose reporting with a Scannerside Advanced analytics package membership for your imaging center. As an integrated solution with RamSoft, the Scannerside Analytics package tracks cumulative dose, provides patient dose printouts & provides real-time analytics via a secure web-portal.*

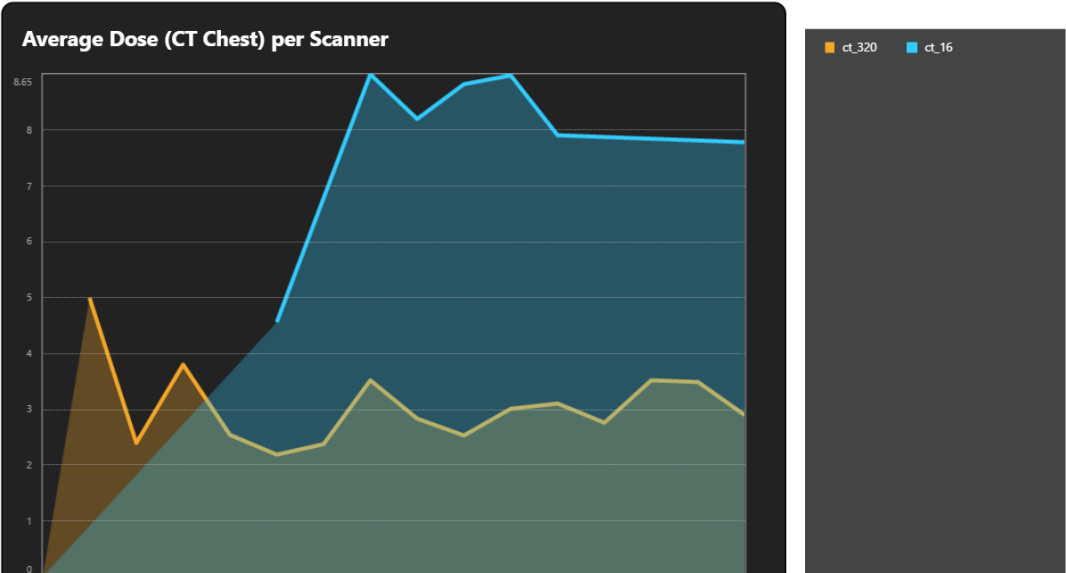

# Benchmarking & Analytics

*Advanced package membership also meets regulatory, joint commission requirements for CT dose monitoring & benchmarking. Real-time CT Dose benchmarking is provided directly from the Scannerside CT Dose Registry. Plus you can download your dose data into an excel spreadsheet.*

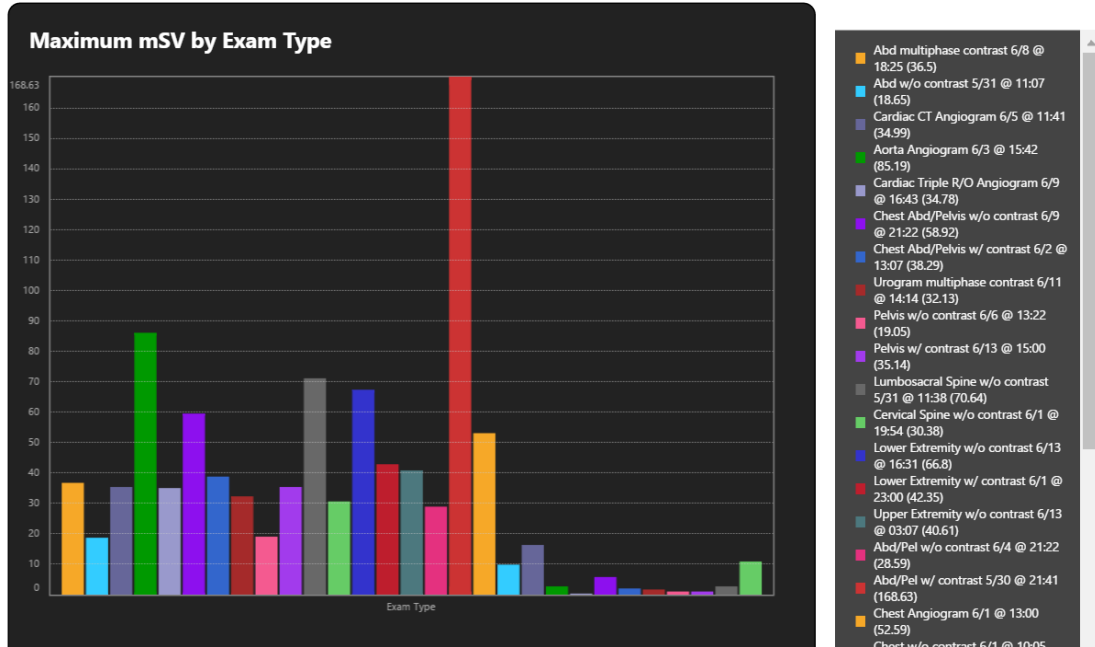

*\*All Analytics are HTML5 and dynamic so they are easy to navigate - hovering highlights the item in orange*

# Analytics Examples

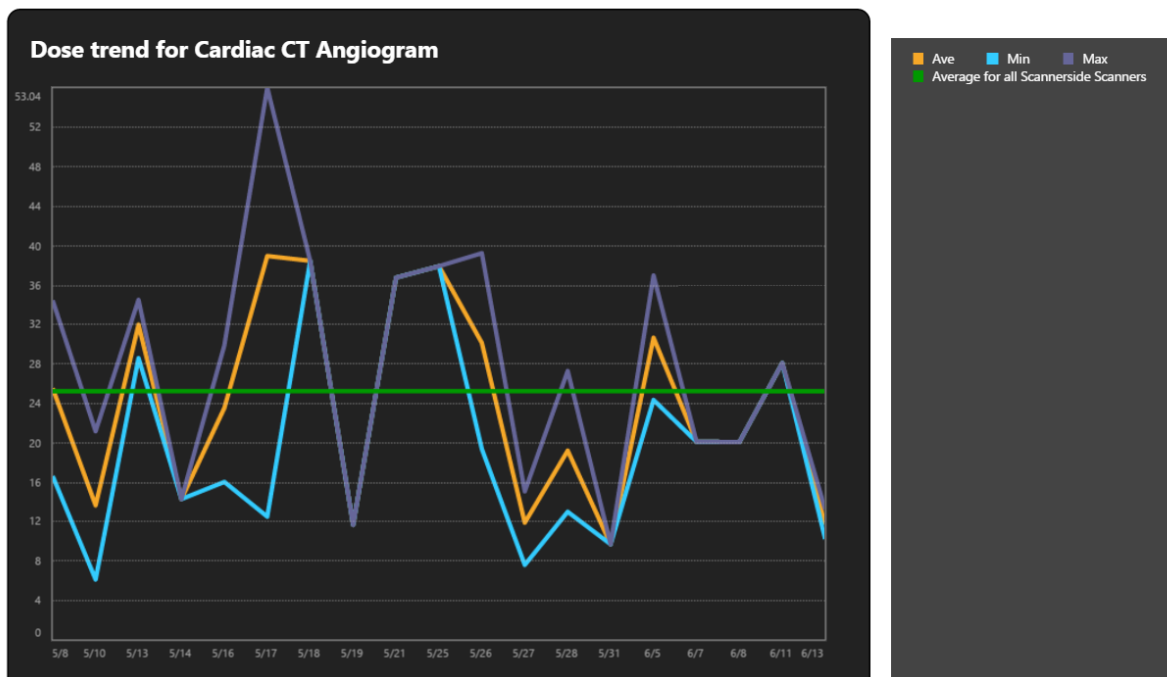

## Track Average Dose Per Scanner

# Identify Top Radiation Events per Protocol

# Detail Exam Dose with Dose Registry Benchmark

# Offer Patient Dose-Printouts Following Exams

Your exam is now complete!

Thank you for your patience.

Your last estimated dosage for today is 18.8375 units (mSV).

Your total estimated exposure is 18.84 units (mSV)

We make sure you have the lowest radiation dosage for your exam type. Look for the Scannerside symbol to know if your facility uses Scannerside to track and monitor your radiation.

In the future if you do need any further imaging be sure to come back to us because we will track the total dose you have accumulated in your lifetime.
